## Summary

---

Skilled and dedicated Full-Stack Developer with strong experience in Web Development, Android App Development, and Python programming. Proficient in building scalable and user-focused digital solutions using technologies such as React, Node.js, Firebase, and PostgreSQL. Experienced in cross-platform development, backend integration, and real-time application logic. Solid foundation in cybersecurity, version control (Git), and OpenCV-based automation. Proven leadership as Project Coordinator at Binary SUST, overseeing tech teams and organizing hands-on workshops. Committed to continuous learning, collaboration, and creating impactful, high-performance digital experiences.

## TECHNICAL SKILLS

---

### Front-End Development:

React.js | JavaScript | TypeScript | HTML5 | CSS3 | Tailwind CSS | SCSS | Next.js | Figma | UI/UX Design | Git | GitHub | Responsive Design | WordPress | Vite

### Back-End Development:

Node.js | Python | Firebase | MongoDB | RESTful APIs | JWT Authentication | WebSockets | API Integration | PHP (basic)

### Android Development:

Java | XML | Android SDK | Android Studio | Firebase Realtime Database | Room Database | MVVM Architecture | Jetpack Components | Material UI

### Programming Languages:

Java | Python | JavaScript | TypeScript | C | Bash | HTML | CSS | PHP (basic)

### Tools & Platforms:

Git | GitHub | Vercel | Netlify | Firebase Hosting | VS Code | Figma | Chrome DevTools | Canva | Postman | Linux (basic)

### Cybersecurity & System Tools:

Kali Linux | Burp Suite | Nmap | Wireshark | Metasploit | OWASP ZAP | Ethical Hacking | Network Security | Web Application Penetration Testing

### Interpersonal Skills:

Problem-Solving | Communication | Time Management | Team Collaboration | Fast Learning | Attention to Detail | Adaptability

## Education

---

**Shahjalal University of Science and Technology, Sylhet**, BA in English Language & Literature

2020 – Present

With a science background, I pursued software development alongside my English studies — combining analytical skills with hands-on tech experience through projects at Binary SUST.

## Experience

---

**Wordpress Developer- Team Lead**, Binary SUST – Sylhet, Bangladesh

2020 – Present

- Developed and adapted custom plugins and components to enhance site functionality and performance.
- Ensured full responsiveness and cross-device compatibility for optimal user experience across desktop and mobile platforms.

**Software Engineer & Android Developer**, Remote –

2018 – 2020

- Design and develop Android applications, including intelligent utilities and voice-assisted tools such as Vision Helper.
- Debug and optimize applications to handle diverse use cases and edge conditions.

- Lead and coordinate tech-based events such as workshops, contests, and seminars to enhance digital skills among students.
- Collaborate with cross-functional teams to plan, organize, and execute technical projects from initiation to completion.
- Supervise web development, programming, and cybersecurity teams to ensure alignment with project goals and timelines.

## Projects

---

### **Binary Sust Official Website** [Visit Website](#)

- **Binary SUST Website** – Developed and managed the official site using WordPress with custom design, responsive layout, and clean navigation.
- Technology Used: WordPress, Elementor, HTML, CSS

### **Personal Portfolio Website** [View code](#)

- Built a fast and responsive portfolio website using React and TypeScript with Vite as the build tool. The site showcases professional experience, skills, and selected projects in a clean and modular layout.
- Technology Used: React, TypeScript, Vite, SCSS, HTML, CSS, JavaScript

### **Advanced Notepad - Android App** [View Code](#)

- A smart note-taking app with support for plain notes and to-do lists.
- Tools Used: Java, Android Studio, MVVM, SQLite

### **Book World - Android App** [View Code](#)

- An app to search, read, and download millions of books for free.
- Technology Used: Java, Android Studio, MVVM, WebView, firebase.

### **Music Player – MP3 & Audio Tag Editor - Android App** [View Code](#)

- Offline music player with equalizer, tag editor, and audio cutter.
- Technology Used: Java, Android Studio, MVVM, MediaPlayer API

### **Locker – Password Manager - Android App** [View Code](#)

- Secure app to store, generate, and manage passwords offline.
- Technology Used: Java, Android Studio, MVVM, AES Encryption

### **Namaz Shikkha - Android App** [View Code](#)

- Islamic app with namaz guide, duas, Quran verses, and digital tasbeeh, compass.
- Technology Used: Java, Android Studio, MVVM, PDF Integration, Custom UI

### **Advanced Code Editor - Android App** [View Code](#)

- Lightweight code editor for HTML, CSS, JS with built-in preview. Syntax highlighting, code runner, source inspector editor, and calculator
- Technology Used: Java, Android Studio, WebView, Jsoup, MVVM
